AUTEL TS508WF QuickStart Guide

Scan the QR code or visit www.autel.com/us to obtain the TS508WF User Manual US.

BASIC FUNCTIONS

EASY & FAST

- . Activate All Known TPMS Sensors
- Read Sensor ID, Temperature, Pressure
- Read Sensor Battery Condition
- On-Tool OF Sensor Information
- Program MX-Sensor by Auto Create
- Batch Program 1-16 MX-Sensors
- On-tool Relearn Procedure Guide

COMPLETE FUNCTIONS

POWFRFUI

- Same TPMS Features as Quick Mode
- TPMS Status Screen View System Faults
- Read & Clear TPMS DTCs
- On-Tool DTCs Description
- Program MX-Sensors by Copying ECU Sensor IDs
- Widest Vehicle Coverage for OBD Relearn
- Tire Pressure Placard Value Reset

AUTEL

Registration & Remember to check monthly & Update for latest software updates.

Please Note: Updates are performed via a computer with Internet access. You could update your device by USB with the Maxi PC Suite or by Wi-Fi. For USB update with the Maxi PC Suite, please refer to the following instructions:

Click on "Maxi PC Suite" to download the application.

AUTEL Sign in or join Autel now.

4

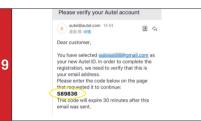

- AUTEL Product Registration 3
 - After sign in with your Autel ID, input the Serial Number and Register Password of your device to bind it to your Autel ID.
- . Unzip and Install Maxi PC Suite. Once installed, the Maxi PC Suite shortcut displays on the desktop. Double-click on the Maxi-PC Suite icon and the application will launch.

Use the USB cable to connect the TS508WF to the computer. Select My Device on the tool. Press Y button.

 The application will scan the tool serial number. A message will display if the tool is not registered. Fill in your email address as the Autel Account to register the tool. If the tool is already registered, go to Step 11.

. Come to your email box. Find the verification code from your email

. The application will display a list of available updates. Click on Undate to initiate download.

- Select Update by USB.
- . Press Y button to place the tool in Update Mode.

· A verification code will be sent to your email address.(If your email address has been signed up before, just fill in your Autel ID password.)

Enter the verification code. Create and input a Password in the space provided, click on Sign Up. Your tool has now been registered with your email address as Your Autel Account.

· Wait for the updates to complete. The update process can be monitored on the display.

- Downloaded programs are installed automatically and will replace older version.
- . The device will display "Update End" once installation is complete.

 When the application displays "No available updates" you may disconnect USB cable from PC and Tool. Your tool is ready to use.

18WF Registration & Update

Remember to check monthly for latest software updates.

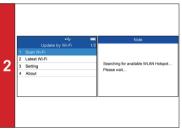

For Wi-Fi update, please refer to the following instructions:

- · Open the device, select My Device on the main screen, press Y button.
- Select Update by Wi-Fi.

. The device will automatically detect whether it's bound to an Autel ID after successfully connected to Wi-Fi.

- Select Scan Wi-Fi and connect to Wi-Fi.
- · You can connect to the same Wi-Fi hotspot directly for the future use by selecting Latest Wi-Fi.

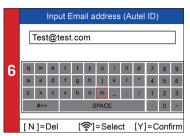

. If you haven't an Autel ID and the device has not been bound, input your email address as your Autel ID.

- . Go to your email box to get the verification code.
- · Input the verification code and your Autel ID password to finish registration.

 After successfully bound, press Yes to continue. Update information will be scanned automatically.

. Input your email address and password to bind the device to your Autel ID if you already have one.

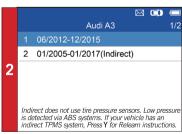

- · If the device software needs to be updated, proceed as information on the screen, connect the device to USB cable, press Y button, updating starts automatically.
- . The device will reboot once update completes.
- . There will be notification if the device software is already the newest version.

TS508WF QuickStart Guide: Quick Mode Basic TPMS Function AUTEL

· On Main Menu select Quick Mode.

· Select vehicle Make, Model, and Year.

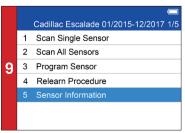

- Select Scan Single Sensor.
- Hold the tool close to the sensor or close to the tire sidewall right above the sensor. Press " 🛜 " button to trigger the sensor.

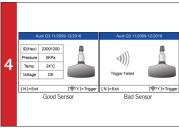

· Select Scan All Sensors.

- Program MX-Sensors by auto create. 1-16 sensors can be programmed at a time.
- (Refer to User Manual: Sensor Programming).

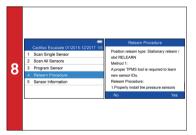

Select Sensor Information.

- If sensor is good (shown left) ID and pressure will display.
- If sensor is bad (shown right) on tool, press N to return to Main Menu.

· Select Program Sensor: program AUTEL MX-Sensor.

 Select Relearn Procedure on-tool relearn procedure guide.

 Sensor Information for both MX-Sensor information & OE sensor information displays.

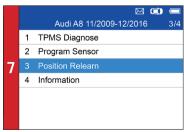

. On main menu, select Advanced Mode.

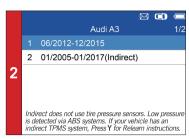

Select TPMS Diagnose: complete TPMS system health check.

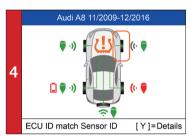

• Select Program Sensor: program AUTEL MX-Sensor.

 Select Position Relearn: on-tool relearn procedure guide & wide OBD relearn coverage.

· Select vehicle Make, Model, and Year.

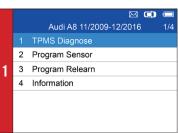

- Read sensor ID from ECU, check sensor ID matching condition, read DTCs from TPMS ECU and clear DTCs.
- (Refer to User Manual: TPMS Diagnose).

- Two ways to program MX-Sensors: Copy by OBD and Auto Create 1-16 Sensors.
- (Refer to User Manual: Sensor Programming).

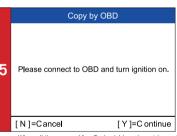

- Three ways for Position Relearn: Stationary Relearn, Automatic Relearn, OBD Relearn.
- (Refer to User Manual: Position Relearn).

- Select Advanced Mode.
- · Select vehicle Make, Model, and Year.
- Select TPMS Diagnose.

Different sensor activation results will display.

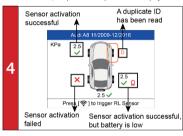

- When all the sensors (4 or 5 wheels) have been triggered, OBD connection option will display(when available).
- · Connect OBD cable to the vehicle and press Y to continue
- The tool will automatically read sensor IDs and DTCs from ECU.

7		TPMS Sta	atus 1/2	
	Pos.	ID(Hex)

Select Position Releam.

Relearn Procedure

Relearn Procedure:

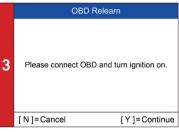

Reset the system after each adjustment of the tire inflation pressure and after every 2 tire or wheel change. Parking the car for

more than 20 minutes. On the Control Display and on the vehicle:

. Follow the Relearn Procedure to perform Relearn.

Relearn Procedure Installation: 1. Properly install tire pressure sensors. 2. Ensure all tires are inflated to the pressure listed on the tire placard. (located in the door jam of your vehicle) Automatic Relearn Procedure: 1. Let vehicle sit for 20 minutes. Drive

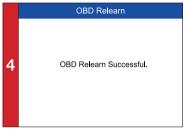

Read the Relearn Procedure carefully.

- Connect the tool to vehicle via OBDII cable and turn ignition on.
- Press Y to continue.

· Activate all sensors mounted on the vehicle.

- OBD Relearn will process automatically.
- OBD Relearn Successful.
